ABAP as main technology provider for SAP S/4HANA

ABAP Cloud Basics

SAP BTP ABAP Environment

Frontrunner for cloud and innovations

ABAP Cloud development model

- Upgrade stable
- Optimized for cloud operations
- SAP S/4HANA optimized

ABAP environment infrastructure

- Scalable
- Resilient
- Automated operation

ABAP Cloud – One development model for SAP S/4HANA and SAP BTP

¹ SAP S/4HANA any premise or SAP S/4HANA Cloud, private edition release ≥ 2022

² SAP S/4HANA Cloud, public edition release ≥ 2208, 3-system landscape required

Development Scenarios in ABAP Cloud

ABAP Cloud Strategy

ABAP Cloud establishes the industry standard for developing enterprise business applications

We accompany the journey.

Increase Developer Productivity

with AI-driven development tools

We ensure competitiveness.

Incorporate Emerging Technologies

by embedding AI into business processes

We are reliable.

Grant Cloud-Native Qualities Out-Of-The Box

like resilience, performance, observability, scalability, extensibility, testability

CDS Table Entities as Draft Persistency

Support of CDS table entities as basis for the transactional draft

The image shows a SAP Fiori draft editor interface. On the left, there is a form with several input fields and buttons. On the right, a code editor displays the CDS table entity definition for `ZDRAFT_TABLE_ENTITY`. The code is as follows:

```
1 @ClientHandling.type: #CLIENT_DEPENDENT
2 @AbapCatalog.deliveryClass: #APPLICATION_DATA
3 @AccessControl.authorizationCheck: #NOT_REQUIRED
4 @EndUserText.label: 'Draft Table Entity'
5 define table entity ZDRAFT_TABLE_ENTITY
6 {
7   key uuid          : sysuuid_x16;
8   salesorderid       : abap.char(10);
9   description        : abap.char(200) null;
10  orderdate          : abap.dats null;
11  @Semantics.amount.currencyCode : 'zsalesorder003_d.grossamountcurr'
12  grossamount        : abap.ccurr(15,2) null;
13  distributionchannel : abap.char(10) null;
14  grossamountcurr     : abap.cuky null;
15  localcreatedby      : abp_creation_user null;
16  localcreatedat       : abp_creation_tstmpl null;
17  locallastchangedby  : abp_locinst_lastchange_user null;
18  locallastchangedat   : abp_locinst_lastchange_tstmpl null;
19  lastchangedat       : abp_lastchange_tstmpl null;
20  include sych_bdl_draft_admin_inc;
21
22 }
```

Change Documents API

Access change documents via publicly released APIs

The screenshot displays the SAP Studio interface with two main panes. The left pane shows the source code for the `I_CHANGEDOCUMENTFORCHGDOCBJ` interface, and the right pane shows its configuration in the API Explorer.

Source Code (Left Pane):

```
[Y13] I_CHANGEDOCUMENTFORCHGDOCBJ
1 @AccessControl.authorizationCheck: #NOT_REQUIRED
2 @EndUserText.label: 'Change Documents Parameter View'
3 @Metadata.ignorePropagatedAnnotations: true
4
5 define root view entity I_ChangeDocumentForChgDocObj
6   provider contract transactional_interface
7
8   with parameters
9     @Semantics.developmentObject.instanceOf: 'CHDO'
10    p_ChangeDocObject : changedocobject
11    as projection on R_ChangeDocumentForChgDocObj
12
13
14    key ChangeDocObjectClass,
15    key ChangeDocObject,
16    key ChangeDocument,
17    key ChangeDocDatabaseTable,
18    key ChangeDocShortTableKey,
19    key ChangeDocDatabaseTableField,
20    key ChangeDocChangeType,
21    key ChangeDocTableKey,
22
23    CreatedByUser,
24    // username -> Text
25    ChangeDocCreatedByUser,
26
27    @Semantics.systemDate.createdAt: true
28    CreationDate,
29    @Semantics.systemTime.createdAt: true
30    CreationTime,
31
32    // Created on
33    CreationDateTimeUTC,
34    CreationDateTimeSystem as CreationDateTime,
35
36    ChangeTransactionCode,
37    ChangeTypeText,
38    @Semantics.language: true
39    ChangeDocLanguage,
40
41    ChangeDocNewFieldValue, // with CURR or UNIT
42    ChangeDocPreviousFieldValue, // with CURR or UNIT
43
44    ChangeDocTextIsChanged,
45
46    // string values
47    ChangeDocNewString,
48    ChangeDocPreviousString,
49    ChangeDocNewShortString,
50    ChangeDocPreviousShortString,
51    ChangeDocNewRawString,
52    ChangeDocPreviousRawString
53
54
55 where ChangeDocObjectClass = $parameters.p_ChangeDocObject
56
```

API Explorer (Right Pane):

The API Explorer shows the configuration for the `I_CHANGEDOCUMENTFORCHGDOCBJ` interface. It includes sections for General, Specific, API State, and Transport. The `Extend (Contract C0)` section shows that the contract is not yet set. The `Use System-Internally (Contract C1)` section shows that the release state is **Released**, and the last changed by is [VAHL](#) (Britta Vahl) on April 23, 2026. The `Use as Remote API (Contract C2)` section shows that the contract is not set. The `API Catalog Assignments` section shows that the object is not assigned to any API catalog.
